

Phillip Frieslaar and I Care Solutions have been partnered with the RBWH Foundation since 2015, providing support and maintenance for our IPTV system.

RBWH Foundation provides in-patient television service to 573 patients, as well as providing over 200 televisions to patient waiting areas across the hospital.

Phillip has been working with us since the implementation of the IPTV system across RBWH in early 2015. I Care Solutions provide a reliable, timely service and go above and beyond our expectations.

I would have no hesitation in recommending I Care Solutions.
